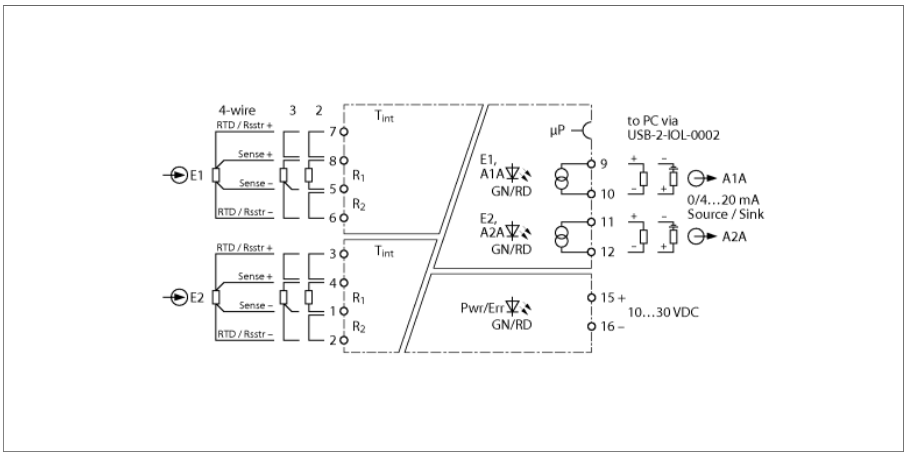
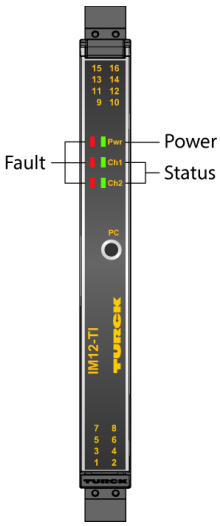
Temperature measuring amplifier 2-channel IM12-TI01-2RTDR-2I-C0/24VDC/CC





The temperature transducer IM12-TI01-2RTDR-2I-C0/24VDC/CC transmits temperature-dependent measured values galvanically isolated. The devices are suitable for operation in zone 2.

The 2-channel device has two inputs for RTDs acc. to IEC 60751, DIN 43760, GOST 6651-94 (2-, 3- and 4-wire) as well as resistors 0…5 kΩ (2-, 3- and 4-wire). Two 0/4…20 mA current outputs are available on the output side.

The device is parameterized via FDT and IODD with a PC. The current outputs can be set (either as source or sink) to 0/4…20 mA. The inputs can be freely assigned to the outputs. In accordance with the parameterization (I1, I2, I1 - I2 or I2 - I1), the input signals are output as a 0/4…20 mA normalized current signal.

The devices have a green power LED (Pwr) and a red LED to indicate internal faults. For each input circuit there is a yellow and a red status LED. A fault in the input circuit leads to a flashing red LED according to NE44, an internal error to a steady red LED. The fault current can be adjusted to < 3.5 mA or > 21.5 mA.

The device can be used in safety circuits up to SIL2 (high and low demand according to IEC 61508) and meets the requirements of NE21. It is equipped with removable spring type terminals.

The device is equipped with removable spring-type terminals.
